Product Descriptions

The Paediatric Pentaflex® mattress replacement design comprises of a reversible 4-way turn, high resilience polyurethane core with 5 anatomical pressure redistributing zones per side, protected by a 2-way stretch, vapour permeable, water resistant cover.

Clinical applications

Indications for Use

Paediatric *Pentaflex* is indicated for users up to 25 kg (55 lbs / 3.9 stones).

WARNING

The cover of this product is vapour permeable but not air permeable and may present a suffocation risk. It is the responsibility of the care giver to ensure that the user can use this product safely.

Instructions for Use

Mattress replacement system:

1. Remove all packaging.
2. Lay the Paediatric *Pentaflex* mattress onto the bed frame, ensuring that there are no sharp edges which might rip the cover.

CAUTION

Do not use the mattress without a cover. It provides a protective barrier against biological contamination of the foam.

3. Ensure the correct month is showing on the Turntable™ indicator at the foot of the cover. If the incorrect month is showing, rotate the mattress to show correct month at the foot end. Months are indicated as follows:
1/12 = January
2/12 = February, etc.
4. Use the *Turntable* indicator as a guide for the monthly rotation and turning of the mattress. This helps to even out wear of the mattress and to extend the life of the product.

Decontamination

To Clean the Cover

Wipe all exposed surfaces with a cloth which has been moistened in simple detergent and water. Ensure to remove any organic debris that may be adherent to the surfaces. Dry thoroughly.

To Disinfect the Cover

For disinfection we recommend a chlorine-releasing agent such as NaOCl or NaDCC diluted to 1,000 ppm (range may vary between 250 & 10,000 ppm depending on contamination status and local policy).

Wipe with a cloth moistened with clean water and dry thoroughly.

Alternatively, use a cloth moistened with alcohol (70%) all allow to air dry.

Routine checks

The foam core and cover should be inspected regularly for any signs of damage, soiling or staining.

使用说明

床垫置换系统：
