### Single leg button and indicator

If a single garment is attached:  
Press the button to prevent the alarm system from indicating a fault.  
There is a beep and the yellow indicator illuminates.

### Garment pressure display

Indicates the actual pressure delivered to the garments.

### Mains power switch

On = I (illuminates green)  
Off = O  
At start up the pump performs a 2 second self test where pressure display, indicators and alarm are tested.

### Pressure control

Increase pressure = turn clockwise  
Decrease pressure = turn counter clockwise  
Pressure range: 30 to 60 mmHg.
