excellence

PRESSURE INJURY PREVENTION

Early & Targeted Intervention Kit (ETIK)

arjo

Pressure injuries are one of the largest unsolved healthcare challenges today¹⁻⁴

International pressure injury prevalence rates are estimated to be between:

IN ACUTE
CARE¹⁻³

5-27%

IN LONG-TERM
ACUTE CARE³

~27%

IN LONG-
TERM CARE⁴

3-32%

Why are pressure injuries difficult to prevent?

RAPID

Injuries can develop quickly with irreversible damage occurring in vulnerable patients within a matter of hours.^{5,6}

INVISIBLE

Inflammatory changes in the skin and underlying tissues may begin 3 to 10 days before becoming visible.⁷

VISUAL RISK ASSESSMENT TOOLS HAVE LIMITATIONS⁸

Visual risk assessment tools are based on subjective interpretation and have low predictive value. They do not always lead to effective pressure injury prevention.

Set a new standard of clinical excellence in pressure injury prevention

Arjo empowers you with the ability to elevate the pressure injury prevention pathway in your care environment, equipping you with the knowledge, skills and tools to act on a new standard of clinical excellence and deliver measurable outcomes in the early identification, prevention and management of pressure injuries.

Early & objective risk assessment

+

Timely and targeted intervention & management

=

Better outcomes & true prevention

Early & Targeted Intervention Kit (ETIK)

Supports you in aligning to the latest international guidelines.

EARLY

Ensure a 5-day*⁹ window of opportunity to deploy preventative intervention.

TARGETED

Targeted interventions guided by objective and anatomically-specific risk assessment.

INTERVENTION

Comprehensive and clinically proven interventions ranging from support surfaces, to repositioning and mobilisation.

KIT

Multi-component intervention kit, including clinical consultancy, supporting customer implementation.

Objective and early risk assessment with **Provizio® SEM Scanner**

Comprehensive **therapeutic support surfaces** portfolio

Targeted **repositioning** and enhanced **mobilisation**

Clinical consultancy delivering measurable and sustainable outcomes

Elevate the pressure injury pathway in your care environment

- Ensure early and targeted risk assessment
- Deliver the appropriate intervention for your vulnerable patients
- Drive clinical excellence and best practice

At Arjo, we believe that empowering movement within healthcare environments is essential to quality care. Our products and solutions are designed to promote a safe and dignified experience through patient handling, medical beds, personal hygiene, disinfection, diagnostics, and the prevention of pressure injuries and venous thromboembolism. With over 6000 people worldwide and 60 years caring for patients and healthcare professionals, we are committed to driving healthier outcomes for people facing mobility challenges.
