

New segment reporting

RESTATEMENT OF HISTORICAL FIGURES
OCTOBER 2026

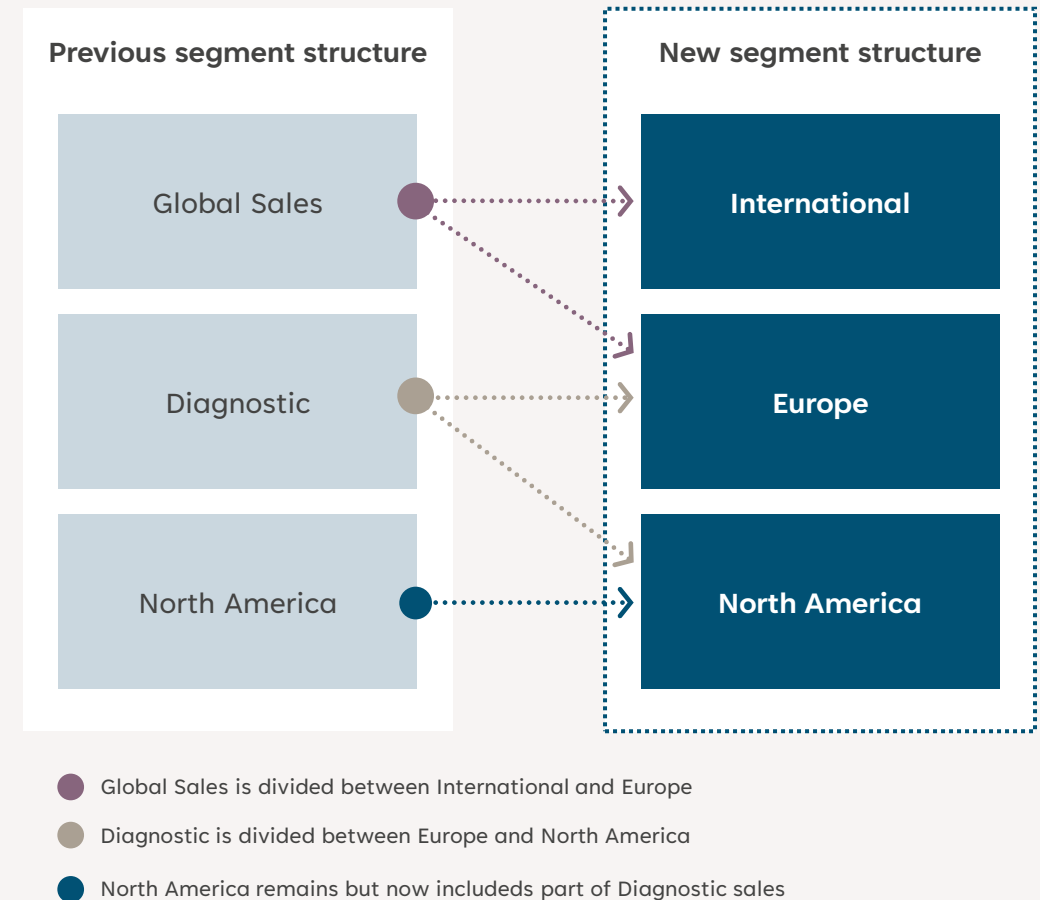

New segment reporting

In connection with the interim report for the third quarter of 2026, Arjo is introducing a new segment reporting based on three geographical segments.

- The new segment reporting aims to provide investors with a more relevant and useful view of Arjo's business by bringing together economically and commercially similar markets in the three reportable segments **Europe, North America and International***.
- Global Sales is now divided between Europe and International. Further, sales of Diagnostics is no longer reported as a separate reportable segment but is instead distributed between Europe and North America.
- The change reflects the transformation journey that Arjo has now embarked on and its new operating model, with increased collaboration and a more integrated approach between the markets in each segment.
- The principles for how revenue and expenses are allocated between segments and group functions remain unchanged.
- To ensure comparability with historical periods, restated historical comparative figures covering the financial years 2024 and 2025 as well as the last ten quarters (Q1 2024-Q2 2026) are published. The restatement does not affect Arjo's previously reported total sales or earnings**.

*Includes the Group's distributor markets

**The historical comparative figures in this document have not been audited by the company's auditor
