In a comparative study, the Minuet® 2 with Pro-Contour® Advance “gave statistically significant lower interface pressure profiles and exerted lower pressure gradients between the flat and Fowler’s position”1

“The design of the mattress platform, until recently of lesser interest, can have a significant effect on pressure exerted at the mattress body interface”1

Intelligent Profiling System

To prevent the potential for the resident to slide down the bed, upon lowering of the backrest, the knee-break will stay raised until the backrest is at the same angle (15 degrees) as the knee-break. At that time, both the backrest and knee-break will descend together until both reach a flat position simultaneously which allows the resident greater stability during repositioning of the Minuet® 2 frame.

This is unique - on other beds the knee-break descends regardless of the backrest angle, which can result in the resident sliding down the bed.

The intelligent profiling system maximizes comfort, improves postural support and helps to reduce pressure and shear which can help to minimize the risk of pressure ulcers. It also can minimize moving and handling risks for the caregiver as the resident is less prone to slide down the bed.

Pro-Contour® Advance Profiling

Pro-Contour Advance Profiling means that the Minuet 2 is anatomically designed to expand the resident's sacral area on the frame as the head of the bed is raised. This provides reduced pressure in the sacral area and increased comfort for the resident. This offers major benefits over conventional profiling beds:

- Enhanced pressure and shear reduction
- Excellent postural support
- Exceptional comfort

▲ Conventional bed pivot points

▲ Pro-Contour® articulation mimics the resident’s natural back and thigh pivot points
An 5" (13 cm) mattress extension is available

Auto-Contour Button
On the Minuet 2 handset, the orange Auto-Contour button allows:
• Pro-Contour Advance profiling
• Effortless upright positioning
• Intelligent profiling system

All of the handset buttons are raised and embossed for ease of use

Optional Siderail
CM-ACC23-1

Half length mobility assist siderail

Lifting Poles
CM-ACC09-1
Single position
CM-ACC10-1
Multi position

Pump Bracket
CM-ACC15-1

Optional Siderail
Pump Bracket accessory

Mattress Extension

Lifting Pole accessory

### Key Advantages

- Battery back-up allows articulation of the bed in the event of a power failure
- *Pro-Contour* Advance Profiling enhances the reduction of pressure, shearing and friction
- Wide range of active and reactive pressure redistributing support surfaces

GETINGE GROUP is a leading global provider of products and systems that contribute to quality enhancement and cost efficiency within healthcare and life sciences. We operate under the three brands of ArjoHuntleigh, GETINGE and MAQUET. ArjoHuntleigh focuses on patient mobility and wound management solutions. GETINGE provides solutions for infection control within healthcare and contamination prevention within life sciences. MAQUET specializes in solutions, therapies and products for surgical interventions and intensive care.
